

Join Us in Combating COVID-19

India is facing an unprecedented second wave of the COVID-19 pandemic with a devastating impact on the health, lives and livelihoods of communities around the country. UNDP is working with the Government of India, the international community, private sector and civil society to bolster health responses, expand social protection, and help rebuild lives and livelihoods.

Responding to the Health Emergency

UNDP is partnering with the *Ministry of Health and Family Welfare and State Health Departments* to support the national vaccination campaign and procure life-saving medical equipment. This support includes:

- + Procuring and setting up **oxygen generating plants**, oxygen concentrators and other critical medical supplies such as ventilators & PPE kits
- + Setting up **COVID waste management plants** to mitigate environmental impacts of hospital generated COVID waste
- + Strengthening and digitizing systems to effectively manage and **deliver vaccines** and track reach to beneficiaries
- + Supporting communication and advocacy campaigns to **combat vaccine hesitancy** and scale up reach and access to vaccines at the last mile
- + Providing **psychosocial support** to vulnerable and marginalized communities

Expanding Access to Social Protection & Building Livelihoods

UNDP is helping to mitigate the impacts of the pandemic on vulnerable and marginalized communities by expanding access to social protection and livelihood opportunities. This includes:

- ◆ Increasing access to information on entitlements and expanding reach of social protection schemes to marginalized individuals & families
- ◆ Facilitating access to local skilling and job opportunities for vulnerable women and youth
- ◆ Restoring rural livelihoods opportunities for women microentrepreneurs and farmers' and artisans' collectives
- ◆ Providing digital and financial literacy trainings to vulnerable women and youth
- ◆ Setting up digital platforms and applying innovations to expand reach of social protection

How is UNDP Helping?

Setting up **11 oxygen generating plants** in the North East of India

Training more than **820,000** health and frontline workers to support national COVID-19 vaccination campaign

Reaching more than **340,000** vulnerable households with information on accessing social protection

Supporting more than **70,000** farmers and artisans to improve livelihood opportunities

Supporting more than **100,000** women and youth to strengthen employability skills

How can Business Contribute?

Business can play a vital role in UNDP's response and recovery efforts to mitigate the impact of the crisis across communities and at an institutional level. We welcome support from corporates, industry, philanthropic organizations and foundations during this critical phase.

Financial contributions

In-kind donation of priority materials and services

Joint advocacy and campaigning
